

MICROSOFT 365 DEFENDER

HOW TO PROTECT YOUR ORGANIZATION AND MITIGATE RISK

- Thank you for joining
- Today's topic – Microsoft Defender for Business
- Post questions via Team's chat box during show
- Post-webinar follow-up via email this week
 - Download slides, recorded webinar, feedback
- Today's speaker
 - Matt Wheeler, Vortex CTO / Co-Founder

- Introduction to Microsoft 365 Defender
 - Microsoft 365 Defender for Endpoint
 - Microsoft 365 Defender for Office 365
 - Microsoft 365 Defender for Identity
 - Microsoft 365 Defender for Cloud Apps
- Deep Dive into Microsoft 365 Defender for Endpoint
- Live Demo
- Q&A

MICROSOFT 365 DEFENDER

- Pre / post-breach enterprise defense suite
- Coordinates detection, prevention, investigation, and response across endpoints, identities, email and applications
- Provides integrated protection against sophisticated attacks
- Automatic action to prevent or stop the attack and self-heal affected mailboxes, endpoints and user identities

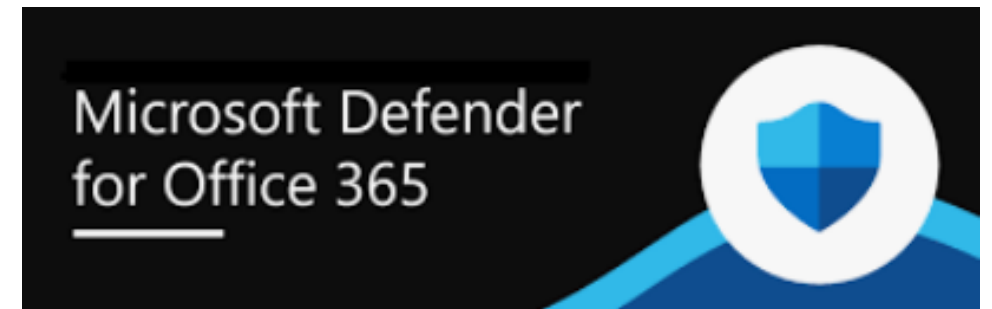

- Unified endpoint platform
 - Preventative protection, post-breach detection, automated investigation and response
- Includes:
 - Endpoint behavioral sensors
 - Cloud security analytics
 - Threat intelligence

DEFENDER FOR OFFICE 365

- Protection against threats that arrive in email, links (URLS), attachments, or collaboration tools like SharePoint, Teams and Outlook.
- Includes:
 - Anti-malware
 - Anti-phishing
 - Anti-spam
 - Safe Links
 - Safe Attachments
 - Defend the workloads
 - Protect with zero-hour auto purge (ZAP)

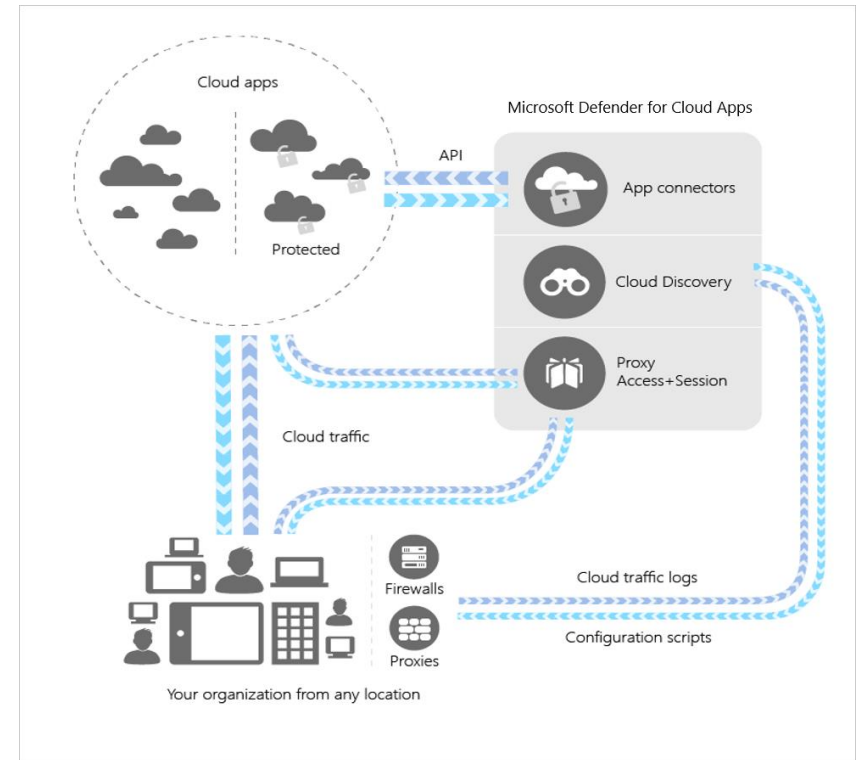

DEFENDER FOR IDENTITY

- Microsoft Defender for Identity is a cloud-based security solution that uses your Active Directory signals to identify, detect, and investigate advanced threats, compromised identities and malicious insider actions directed at your organization.
- Defender for Identity allows for:
 - Monitoring and analyzing user behavior and activities
 - Protecting user identities and reducing the attack surface
 - Protecting the AD FS in hybrid environments
 - Identifying suspicious activities and advanced attacks across the cyber-attack kill-chain
 - Investigating alerts and user activities

DEFENDER FOR CLOUD APPS

- Cloud Access Security Broker (CASB)
- Defender for Cloud Apps Framework:
 - Discover and control the use of Shadow IT
 - Protect your sensitive information anywhere in the cloud
 - Protect against cyberthreats and anomalies
 - Assess the compliance of your cloud apps

- Core Defender Vulnerability Management
- Attack surface reduction
- Next-generation protection
 - Received a max protection score from av-test.org
 - [9 Security Packages for Consumer Users in an Advanced Threat Protection Test against Ransomware \(av-test.org\)](#)
- Endpoint detection and response
- Automated investigation and remediation
- Microsoft Threat Experts

LIVE MS DEFENDER DEMO

[LINK TO DEMO >](#)

- Microsoft Defender Suite is a comprehensive cybersecurity solution by Microsoft to protect against threats and secure your digital environment
 - Microsoft 365 Defender for Endpoint
 - Microsoft 365 Defender for Office 365
 - Microsoft 365 Defender for Identity
 - Microsoft 365 Defender for Cloud Apps
- Defender for Endpoint is a unified endpoint platform which includes:
 - Endpoint behavioral sensors
 - Cloud security analytics
 - Threat intelligence
